## **Documentation of Department Discussions**

### **Strengths of the Program**

At this time all standards are being achieved by the Students at Sterling College. The Program is in good standing at this time according to the data

### **Areas to Improve**

The Program needs to continue to try and improve in the Behavioral Sciences and Economics standards. The data shows the standards are being met but there could be improvement in this area.

### **Changes / Updates / Topics for Discussion**

(syllabi, college catalog, curriculum, specific courses, specific assessments, etc.)

The Department needs to continue to monitor the students in Economics and the Behavioral Sciences – there could be improvement in those two areas. The Department needs to make sure that the students continue to improve. The Department might need to look at the assignments to make sure that the students are getting practice so they can continue to meet the standards.
